Section 2: Certification of Medical Necessity

Ambulance transportation is medically necessary only if other means of transport are contraindicated or would be potentially harmful to the patient. To meet this requirement, the patient must be either "bed confined" or suffer from a condition such that transport by means other than ambulance is contraindicated by the patient's condition. To be "bed confined", the patient must be: (1) Unable to get up from bed without assistance; AND (2) unable to ambulate; AND (3) unable to sit in a chair or wheelchair **(Note: ALL THREE OF THE ABOVE CONDITIONS MUST BE MET IN ORDER FOR THE PATIENT TO QUALIFY AS BED CONFINED).**

The following four options must be completed by the medical professional signing below for this to be certification to be valid:

1. Is this patient "bed confined" as defined above? Yes / No
2. Can this patient be safely transported in a wheelchair van or by other alternative means transportation (i.e., seated for the duration of the transport, and without a medical attendant)? Yes / No
3. Other means of transportation is contraindicated because they would endanger the health of the patient. Yes / No
4. Explain/elaborate, in a short statement, on the condition of the patient requiring ambulance transportation and why transport by other means in contraindicated by the patient's condition.
